

# PDF example

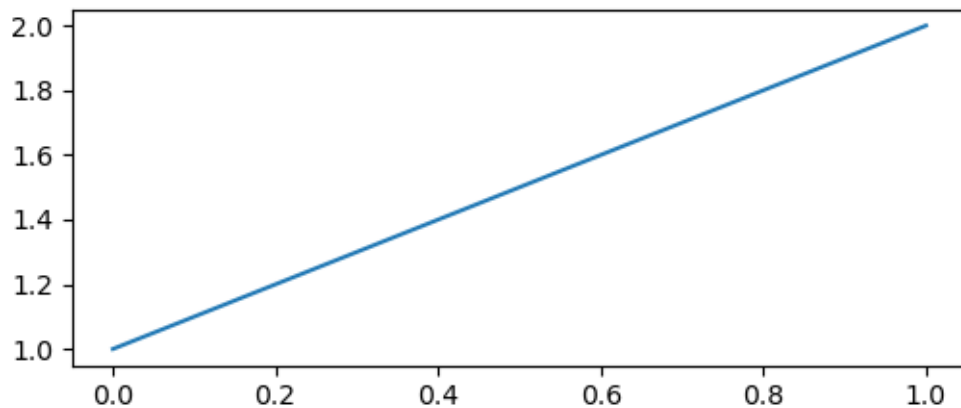

## PDF Output

Quarto can handle images and tables in PDF output, but not rich HTML outputs. Here's an example of what can be accomplished with the `marimo` exports to pdf.

## Images

We can still do plots!

```
# create the plot in the last line of the cell
import matplotlib.pyplot as plt
plt.plot([1, 2])
```

## Tables

We can also do tables!

```
import pandas as pd
df = pd.DataFrame({
    'A': [1, 2, 3],
    'B': [4, 5, 6]
})
df
```

	A	B
0	1	4
1	2	5
2	3	6

## Text / Markdown

You can also include text or markdown in the PDF output.

Which can be useful for embedding computed values like the fact  
that this was rendered by Marimo 0.6.11 on 2024-06-03 17:14:34.497304.
